Thank you for adding that picture. I also want to change a few pictures to align with my company instead of AI generated photos.

Me
Sure, you can share.

griffinschulz10
yes let me find a few pictures and will get back to you. On the website there is a link to join our newsletter. Can you show me how to set that up? So when people click it they can receive a letter each month to their email after they sign up?

Me
Yes, I can.

griffinschulz10
hi can we connect this week so you can show me how to set up the newsletter and also track analytics about the site?

Me
Absolutely, we can connect this week to go over the newsletter setup and website analytics.

Also, I wanted to ask if you'd like me to set up SEO for your website. SEO, or search engine optimization, will help your site rank higher in Google search results, attract more visitors, and improve overall visibility for your company online. I can implement it so your website is more likely to reach potential clients organically.

Let me know if you'd like me to include this.

griffinschulz10
how does that work? please share more about it. also, what day works best to go over these things and I need one favor. I got rid of a member of my team and I deleted his picture but I am having trouble getting the current profile pictures to look centered and even on the page. are you able to assist what that?

Me
To appear on Google, SEO work is required. Google does not automatically rank new websites without optimization.

I offer SEO in two stages.

Option 1. On page SEO setup:

With this, I will help Google discover, understand, and index your website.

What I will do with on page SEO:
- Google Search Console and Google Analytics setup
- Submit sitemap and ensure proper Google indexing
- Optimize page titles and meta descriptions
- Fix heading structure and basic SEO issues
- Improve website speed and mobile performance
- Basic content optimization so Google understands your services

This helps Google recognize your website and start showing it in search results.

Cost for on-page SEO: \$280 USD (commonly)

Option 2. Full SEO monthly work:

SEO is a long term process. To rank higher organically, consistent work over several months is needed.

What I will do in the first month:

1. Google setup and indexing
- Google Search Console and Analytics setup
- Sitemap submission and indexing checks

2. On page SEO foundation
- Optimize titles, descriptions, and headings
- Fix technical and basic SEO issues
- Improve speed and mobile usability

3. Local SEO
- Optimize Google Business Profile
- Ensure correct business information for local searches

4. Content and trust signals
- Improve key page content
- Add basic trust elements for Google and users

5. Final review
- Check indexing and performance
- Provide a clear report and next month plan

Goal after the first month:
- Your website will be indexed on Google
- Searching your business name should start showing your website
- Google will begin collecting data and impressions
First month SEO setup price: \$400 USD

After the first month, we can continue SEO monthly based on progress and your goals. Reaching strong rankings usually takes 5 to 6 months or more.
